Letter from the CEO

Dear weFEEDsa Family,

As we enter 2026, we pause to reflect on the close of an extraordinary year for weFEEDsa. December 2025 marked the conclusion of a period defined by resilience, delivery, and meaningful impact – and it is with deep gratitude that I acknowledge how far we have come together.

Throughout 2025, weFEEDsa strengthened its footprint across communities by advancing food security, expanding access to water, supporting education, and creating pathways through social employment. These outcomes were not achieved in isolation. They are the result of committed partnerships, a dedicated team, and supporters who believe that sustainable change is built through action, accountability, and compassion.

While 2025 has closed successfully, we see it not as an endpoint, but as a foundation.

We begin 2026 with renewed energy and a bold step forward through the launch of **weFEEDsa Labs** – an exciting initiative designed to bring powerful ideas for social impact to life. weFEEDsa Labs will serve as a platform for individuals and organisations who care deeply about society and are ready to turn ideas into practical, scalable solutions. It is where innovation meets execution, and where collaboration is transformed into real-world impact.

At weFEEDsa, we believe the next phase of social progress will be driven by people who are willing to think differently, act courageously, and commit to long-term solutions. weFEEDsa Labs embodies this belief and signals our intent for 2026: to innovate with purpose and to amplify impact.

As we start the new year, I would like to sincerely thank our partners, donors, volunteers, team members, and stakeholders for the trust and support extended to us throughout 2025. Your confidence in our mission enables us to continue serving communities with integrity and scale.

We look ahead to 2026 with optimism, focus, and ambition – ready to build on our momentum and unlock new possibilities for social change.

Wishing you a successful, purposeful, and impactful year ahead.

Warm regards,

Zahid Fahey

INTRODUCING *we* FEEDLABS

A PILOT THINK TANK BY WEFEEDSA - IT'S TIME TO TURN IDEAS INTO ACTION.

weFEEDsa Labs is a community-powered innovation space designed for South Africa's changemakers – a place to shape ideas, lead change, and build the future we want to see. As a **pilot think tank by weFEEDsa**, that brings together young leaders, professionals, and community members who are passionate about tackling real challenges through collaboration, creativity, and evidence-based solutions.

weFEEDsa Labs kicks off with a **discovery session on Saturday, 24th January, and Wednesday, 28th January**. Participants will work together to design practical, community-led solutions that address focus areas, including **education, empowerment, food security and nutrition**. This is a hands-on learning experience – moving beyond discussion to co-create programmes that can be used for **real** impact.

Rather than jumping straight to solutions, the **Discovery Session** focuses on understanding what is really happening on the ground and why. This sets the direction for the Labs as a whole. Insights gathered during this phase inform idea development, solution design, and programme planning in later stages, ensuring that any interventions developed are relevant, community-led, and grounded in real needs. You'll develop a portfolio of real-world impact, receive guidance and mentorship, and be part of a collaborative space that challenges you to **think bigger, act smarter**, and lead with intention. These sessions follow from insight to implementation: starting with discovery and problem-mapping,

moving to idea development, evidence gathering, and solution design. Promising concepts are refined through mentorship, tested in communities, and developed into practical programmes that align with **weFEEDsa's** mission – ensuring that innovation doesn't stop at conversation, but translates into measurable, real-life change.

weFEEDsa Labs also creates a meaningful opportunity for sponsors to support and sponsor carefully developed, community-led projects. By supporting weFEEDsa Labs projects, sponsors contribute directly to solutions that are evidence-based, impact-focused, and ready to be rolled out within communities – helping turn well-designed ideas into real-world change.

”
The future is built when people come together to solve what truly matters.

Follow the journey on our social media platforms. **Sponsor a solution.** Be part of creating lasting impact. Whether you're a student, professional, or community member, if you're ready to turn ideas into action, **weFEEDsa Labs** is the place where your contribution can help shape meaningful, lasting change.

BE PART OF THE PILOT. HELP CREATE THE FUTURE.
